IN THE UNITED STATES DISTRICT COURT
FOR THE EASTERN DISTRICT OF TEXAS
MARSHALL DIVISION

SOLOCRON MEDIA, LLC, Plaintiff, v. VERIZON COMMUNICATIONS INC., CELLCO PARTNERSHIP D/B/A VERIZON WIRELESS, AT&T MOBILITY LLC, SPRINT SPECTRUM L.P., AND T-MOBILE USA, INC., Defendants.	Civil Action No. 2:13-cv-1059-JRG **Jury Trial Demanded**

DECLARATION OF CHRISTOPHER BUTLER

My name is Christopher Butler and I declare as follows:

1. I am the Office Manager at the Internet Archive, located in San Francisco, California. I make this declaration of my own personal knowledge.

2. The Internet Archive is a website that provides access to a digital library of Internet sites and other cultural artifacts in digital form. Like a paper library, we provide free access to researchers, historians, scholars, and the general public. The Internet Archive has partnered with and receives support from various well-known institutions and libraries, including the Library of Congress.

3. The Internet Archive has created a service known as the Wayback Machine. The Wayback Machine makes it possible to surf more than 240 billion pages stored in the Internet Archive's web archive. Visitors to the Wayback Machine can search archives by URL (i.e., a website address). If archived records for a URL are available, the visitor will be presented with a

Verizon Wireless
Exhibit 1019-0001

list of available dates. The visitor may select one of those dates, and then begin surfing on an archived version of the Web. The links on the archived files, when served by the Wayback Machine, point to other archived files (whether HTML pages or images). If a visitor clicks on a link on an archived page, the Wayback Machine will serve the archived file with the closest available date to the page upon which the link appeared and was clicked.

4. The archived data made viewable and browseable by the Wayback Machine is compiled using software programs known as crawlers that surf the Web and automatically store copies of website files, preserving these files as they exist at the point of time of capture.

5. The Internet Archive assigns a URL on its site to the archived files in the format http://web.archive.org/web/[Year in yyyy][Month in mm][Day in dd][Time code in hh:mm:ss]/[Archived URL]. Thus, the Internet Archive URL http://web.archive.org/web/19970126045828/http://www.archive.org/ would be the URL for the record of the Internet Archive home page HTML file (http://www.archive.org/) archived on January 26, 1997 at 4:58 a.m. and 28 seconds (1997/01/26 at 04:58:28). A web browser may be set such that a printout from it will display the URL of a web page in the printout's footer. The date assigned by the Internet Archive applies to the HTML file but not to image files linked therein. Thus images that appear on the printed page may not have been archived on the same date as the HTML file. Likewise, if a website is designed with "frames," the date assigned by the Internet Archive applies to the frameset as a whole, and not the individual pages within each frame.

6. PDF files are supplied with the corresponding URL, including the file's date and time codes, on an attached cover sheet.

VERY IMPORTANT: To avoid disappointment, please read this entire page carefully before placing your order!

Is your phone compatible?

It is in your interest that you check your phone will work before paying for the service. Please look up your phone model, ask your mobile phone dealer if unsure, then see what services are available to you. An X indicates that service will not work with your phone. This is a guide only, **you are responsible for ensuring your phone will work with the service before ordering.** If you still have a Nokia 2110 or 3110 phone then it is time to upgrade, we recommend the Nokia 3210 or 7110 to new buyers.

In addition, your phone must be enabled to receive SMS (text messages).

Spate of wrong numbers being given

We are getting lots of orders recently with wrong numbers and invalid email addresses. In the order form we ask three times for you to check your details, and it is solely your responsibility to ensure you are putting the right phone number.

It may help for you to write your phone number in the usual way i.e. 07123 456789, then to take out the spaces and remove the first zero. If your phone number does not start 07 yet, then do not put the 07 in your number! This is all we require you to do, so please GET IT RIGHT!

If you still get it wrong despite all these reminders, we regret that someone else may receive your order and you will have just purchased them a surprise present!

Win £0 in our free prize draw

Every order you place between now and 31st January 2000 gives you the chance of winning £0 in our free prize draw. Usual prize draw conditions apply.* If you want to be a winner then don't delay, order now!

```
TERMS AND CONDITIONS

YOU = The person ordering the service from us
US, WE, SMI = Swindale Marketing International
NOKIA is a trademark.
```

ORDERS CAN ONLY BE ACCEPTED FROM ENGLAND, SCOTLAND, NORTHERN IRELAND, AND WALES AT PRESENT.

WE ARE ONLY ABLE TO ACCEPT ORDERS IF YOUR PHONE IS ON THE UK ORANGE, ONE2ONE, BT CELLNET, OR UK VODAFONE NETWORKS FOR OPERATOR LOGOS, ANY UK NETWORK FOR RING TONES AND GROUP GRAPHICS.

Sorry, we are unable to accept international orders (including orders from the Republic of Ireland) at present due to a

Verizon Wireless
Exhibit 1019-0025

technical problem with our network provider. We hope this will be fixed as soon as possible, however they have been unable to give us a definite timescale.

Ordering shall be deemed as acceptance of the terms and conditions in absence of any signature.

Please click here to order.

* No purchase necessary. To enter without making a purchase, send a stamped addressed envelope to: Nokia Free Prize Draw Department, c/o 1333 Victoria Centre, Nottingham NG1 3PJ. This address is not for correspondence. Full rules of entry available upon written request.

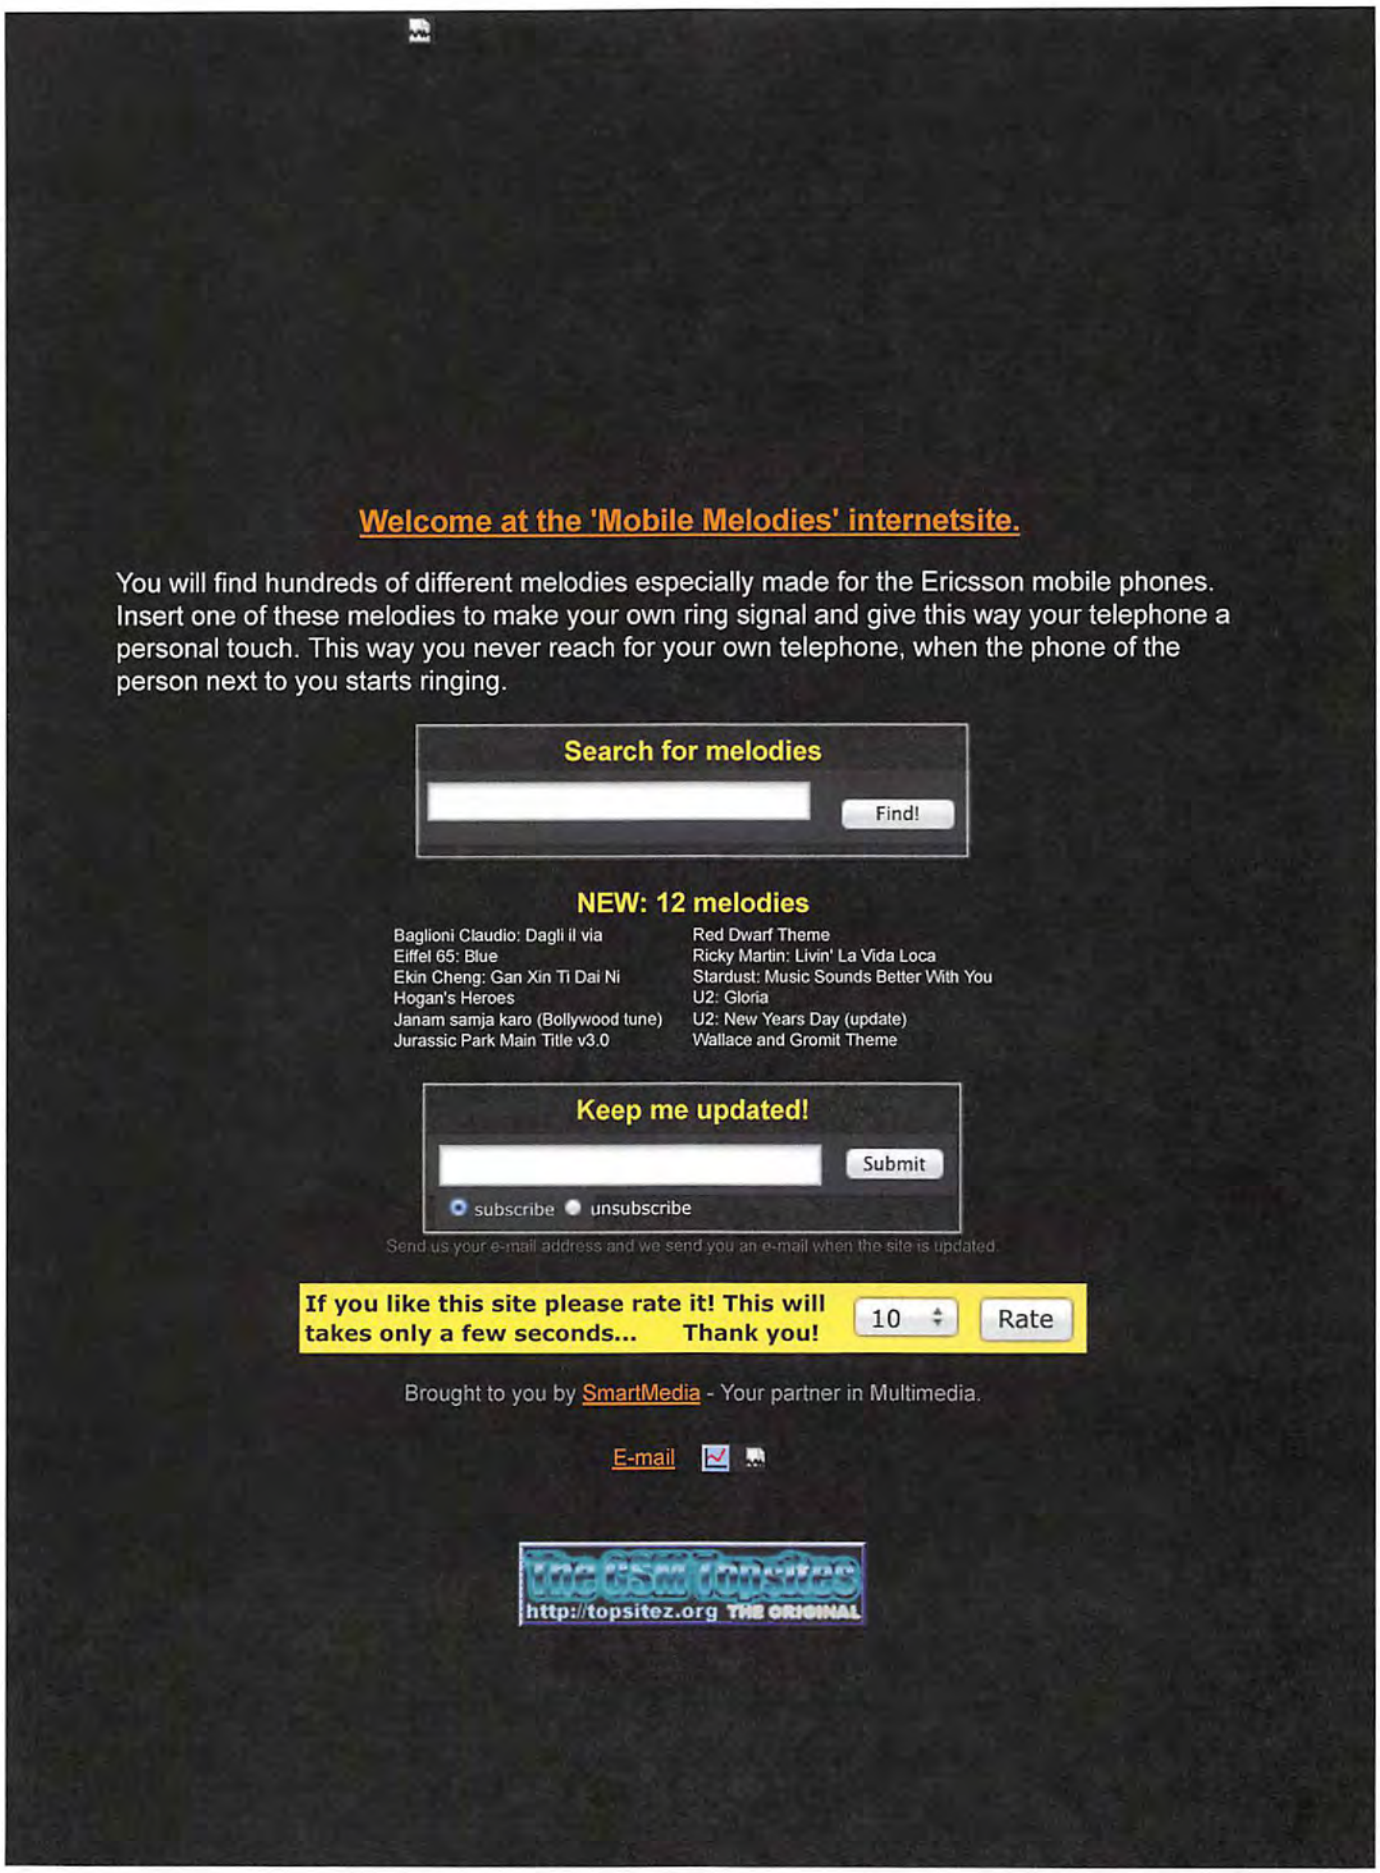
Exhibit 10



Welcome at the 'Mobile Melodies' internetsite.
You will find hundreds of different melodies especially made for the Ericsson mobile phones. Insert one of these melodies to make your own ring signal and give this way your telephone a personal touch. This way you never reach for your own telephone, when the phone of the person next to you starts ringing.

How it Works

Make your phone rock when it rings with Modtones! All you need is:

- **A supported handset** from Verizon Wireless
- The Modtones BREW™ application
- (optional) This website, for easier searches

Phones that Support Modtones

Modtones application demo

To get started, download the Modtones application from Verizon Wireless' BREW™ Shop on your BREW-enabled mobile phone. You have the choice of pre-paying for one, five or ten ringtone credits with the program. Each ringtone credit is good for one ringtone download, and the charges will appear on your Verizon Wireless bill.

Ringtone credit prices (each good for one ringtone download):

$1.49 for one
$6.49 for five
$9.99 for ten

If you run out of credits, visit the Verizon Wireless BREW™ Shop on your phone. Select Modtones and purchase more.

From the Modtones application, you can check out our featured tones, search for artists or songs, or browse our categories.

For more information, download the **Modtones User Manual** in PDF format.

BREW™ is a registered trademark of QUALCOMM™.

Website Functions

Search -- You can search for ringtones either by the name of a particular song, or by artist. You can use single words, like "love" to see all the ringtones whose title contains that word, or search for a complete song name to see if we have the exact tune you're looking for.

Searching for an artists' name, like "The Beatles", will display all the songs by that artist. If you can't remember the name of an artist, you can search for a fragment of the name. Searching for "Spoon", for instance, will show you tracks by The Lovin' Spoonful.

Once you have found the song or songs you're looking for, click Listen to hear the music as a

http://web.archive.org/web/20000619114757/http://www.yourmobile.com/help.html

Verizon Wireless
Exhibit 1019-0048

MIDI or Real Media file. **Send** to send to a Nokia phone that can receive ringtones, or **Text** to see how to input the ringtone into your phone.

Currently, only late model Nokia phones are able to receive ringtones via SMS messaging. If you're not sure whether your Nokia phone can receive a ringtone, please take a look at our comprehensive list of **compatible handsets**.

\\ contents

Listen -- Ringtones are available for preview in MIDI format. For those unable to access the MIDI preview feature, additional help and Real Media previews are coming soon.

\\ contents

Send -- To send to a compatible Nokia phone, click the ***Send*** link on any results page and follow the prompts on the screen. You must enter a valid name and email address, as we will be forwarding a confirmation when the tone has been sent. Likewise, please make certain that you enter the correct telephone number, and the full international dialing codes required for the country to which you are sending the ringtone.

We use **cookies** to keep track of your personal setting so that we only have to ask you questions on your very first visit. This allows us to give you a very fast, customized service when you return. If you are asked for the same information many times while at YourMobile.com, you may have cookies disabled. Please make sure that you do not have cookies turned off in your browser's preferences/internet options settings. By default, they are on, so you don't need to worry unless you have turned them off at some time in the past.

If you send a ringtone and it **doesn't arrive**, please check that your phone model is listed below. If it is, send us email at : **notone@yourmobile.com** and let us know what song you were trying to send. We'll check our records and get back to you. make sure you send email from the same email address as you gave us at the time of sending, so that we can do the necessary cross-checks.

Unfortunately this **error message** means that your operator's SMS center does not currently support 7-bit BinHex file deliveries. We suggest that you ask your operator to upgrade the service so that you can receive binary files like ringtones and logos. Alternatively, if you know a friend to whose phone you can send ringtones, put his/her GSM (PCS) chip in your phone, send the ringtone you want to his/her telephone number (to your phone), received and save the ringtone, and then swap your GSM chip back into your phone. The phone itself will retain the ringtone.

The following Nokia models are capable of **receiving ringtones** via SMS : 3210, 5190, 6110, 6130, 6150, 6150e, 6190, 61601, 61621, 6162, 6210, 6250, NK702, 7110, 8110i, 8130, 8146, 8210, 8810, 8850, 8890, 9000 and 9110. **If your model is not listed here, we do not currently support it.**

Please note: The 5190 requires specific software versions to receive ring tones.
To check the software vesion of your 5190 press *#5190# on your keypad. The software version for the 5190 will be indicated on the first line. If the phone displays either V5.71 or V5.81, your phone can receive ring tones.

Please note: The 5110 can NOT receive new ringtones.
The Nokia model 5110 predates the release of the hardware and software needed to receive and store custom ringtones and logos over the air.

\\ contents

Text -- The ***Text*** function displays various scripts to allow ringtone melodies to be manually input into many models of mobile phone. For more details, go to ***Handling Ringtones*** in the table of contents and click the name of your phone's manufacturer.

\\ contents

Top Tones -- We pay attention to every click on the site, and every ringtone sent. From that data, we produce a chart of the 25 most popular tones. The chart is updated in real-time to reflect our users' changing taste. So whether you want to make sure you're in with the pop crowd, or make sure you're nowhere within a thousand miles of them, check into **Top Tones** and find out exactly what's going on.

\\ contents

New Additions -- If you are a new visitor you will see a list of the 50 tones that we've added

Verizon Wireless
Exhibit 1019-0049

most recently. if you are a return visitor to the site however, you can check into this page to see what's been added since the last time you visited. We add new ringtones to the site daily, so this is a great way to save time by checking on only the new stuff.

How do we do it? We use a unique identifier called a cookie so that we can recognize you and know when you last stopped by. For more information on cookies, look here.
\\ contents

Suggest a Ringtone -- We want to make sure that YourMobile com gives you the songs and the artists that you want. We are constantly creating new ringtones and adding them to the site. if you don't find the ringtone you're looking for, use the ***Suggest a Ringtone*** form to let us know what's missing. We get hundreds of requests every week, so we can't promise that we'll add the tone you suggest, but if we do, we'll drop you an email and let you know when it's available. We want to make this the best service possible. Please let us know how we can improve it.
\\ contents

Handling Ringtones

Nokia - Receiving a Ringtone via SMS -- The following Nokia models are capable of **receiving ringtones** via SMS : 3210, 5190, 6110, 6130, 6150, 6150e, 6190, 61601, 61621, 6162, 6210, 6250, NK702, 7110, 8110i, 8130, 8146, 8210, 8810, 8850, 8890, 9000 and 9110.

NOTE: The 5110 can NOT receive new ringtones. The 7100-series, 8210, 9000, and 9110 can store up to five (5) custom ringtones. All others only allow one (1) custom ringtone at a time.

If you have one of these phones, you can send a ringtone directly from this site by clicking the **Send** link on any results page and following the prompts on the screen. You must enter a valid name and email address, as we will be forwarding a confirmation when the tone has been sent. Likewise, please make certain that you enter the correct telephone number, and the full international dialing codes required for the country to which you are sending the ringtone.

The ringtone will arrive at your phone normally within a few seconds. You will hear the same tone as you hear when any other SMS message or numerical page arrives. Your phone will display the message **Ringtone Received**. Press **Options > Playback** to hear the new ringtone. If you want to keep the Ringtone, press **Save**. Most Nokia models which support this facility will only allow you to store one such ringtone in a user defined slot, so the next time you request a new ringtone it will replace the one you had previously stored in the user preset. Later models will allow multiple ringtones to be stored. Currently the only models that allow such a function are the Nokia 7100-series, 8210, 9000, and 9110.

To make your phone ring with the new tone, go to the Options or Profile menu and select it from the menu of available ringtones. To do this, press the **menu** button, scroll down to **profiles** and press **select**. You will see a list of available profiles. Depending on your model of phone, select **normal** or **general**, and press **options > customize** scroll down to **ringing tone** and press **select**. Scroll through the list of names until you find your new ringtone (the name may be shortened, so be creative) and press **ok**. Your phone will now ring with the new ringtone when the normal or general profile is selected.

Remember that if you use a headset, you should go through the same process for the headset profile, as it will change automatically whenever your headset is plugged in.
\\ contents

Nokia - Manual Ringtone Input -- If your phone has **Composer**, you can enter one ringing tone of your own by inputting the text from yourmobile.com into Composer. The name of the tone is shown last in the tone list.

Creating a new ringing tone
When you enter this function, the tone that you created previously is shown, if available.

To enter a new or edit an existing tone:

1. **Enter the desired notes**

Verizon Wireless
Exhibit 1019-0050

Press:

1 for note c
2 for note d
3 for note e
4 for note f
5 for note g
6 for note a
7 for note b
0 for a p (pause = "Rest")

The phone plays each note after it is entered (unless the phone tones are off).

2. To **adjust the characteristics** of the note, do as follows:

Note duration: 8 shortens (-) and **9** lengthens (+) the duration of the note or rest. The default duration is 1/4. The duration is shown in front of the note, e.g. 16d denotes a note d with duration1/16.

Rest: 0 inserts a rest (i.e. pause) of the same duration as the previous note.
The default duration of a rest is one quarter note (1/4).
The rest is indicated by the - character.

Octave: *+ sets the octave for new notes. The octave is shown as a number after the note (e.g. e1).

Pitch: #↑ makes the note sharp (indicated by # in front of the note), e.g. #f. The pitch selection is not available for notes e and b.

3. To edit the notes, do as follows: ↗ and ↙ to move the cursor right or left, respectively. **C** deletes a note or a rest to the left.

4. After you have completed the tone, press **Options**, choose one of the functions below, and press **OK**.

Play??? : Plays back the notes to the left of the cursor.
Save??? : Allows you to name the tone and add it to the ringing tone list.
Tempo??? : Allows you to select the desired tempo for the tone (in beats per minute).
Send??? : Allows you to send the tone to another phone.
Clear Screen??? : Deletes all the notes from the display.

REMEMBER! Your phone must be switched on to use this function. Do not switch the phone on when wireless phone use is prohibited or when it may cause interference or danger.
\\ contents

Ericsson - Manual Ringtone Input -- To input a tone into your Ericsson phone, follow the key press instructions on the YourMobile.com text display page.

The following phone keys correspond to the following functions :

The **Number keys, 1 - 9** will insert notes into the ringtone sequence. **1** gives a **C** and **9** a high **D**. Holding down a number key will make the note longer.

The **# key** will increase or decrease the pitch in steps of one semitone. Press once to make a note a **sharp** (#), and twice to make it a **flat** (b), pressing three times will return the note to its normal pitch.

The **<<** and **>>** keys allow you to **scroll backward** and **forward** within the ringtone's sequence of notes. **Press and hold** either to jump to the beginning or end.

The **Zero key** will **move a note** up or down one octave. A **+** sign is added before a note name if the octave has been raised.

The **CLEAR key** will **erase the note** to the left of the cursor.

NOTE : Pressing and holding the CLR button will erase the entire sequence.

Verizon Wireless
Exhibit 1019-0051

Siemens Manual Ringtone Input --

The following Siemens models are able to accept a manual ringtone input :

C25, C35i, S25, S35i, M35i

In order to input a tone, in your Menu, scroll to Ringer Tones and Select, then scroll to "Record Melody" and "Select"

The following phone keys correspond to the following functions :

The **Number keys**

1 will insert note **C**

2 will insert note D

3 will insert note **E**

4 will insert note **F**

5 will insert note **G**

6 will insert note **A**

7 will insert note **B**

8 will insert note **C octave**

The **Zero 0 key** will enter a pause into the sequence

Holding down a number key will make the note longer.

The **# key** will **move a note** up or down one octave.

The * key moves the note up a semitone ("is")

On some models, use the menu to Play or Rewind the tone

On other models:

The → **key** will **Play** the ringtone sequence.

The ← **key** will **Rewind** the ringtone sequence.

The ↑ **and** ↓ **keys** will **make notes higher or lower.**

Other Help

Contact Us -- For general inquiries, employment information or suggestions about the service, please send email to - **info@yourmobile.com**.

If you have suggestions for songs or artists that you feel we should add to the site, please click ***Suggest a Ringtone*** in the main navigation panel.

\\ contents

Get the Real Player -- To hear Previews in Real Media format, you will need the Real plug-in for your browser. The plug-in is free and installs automatically. It is available for all popular platforms and browsers from their website at - **www.real.com**.

\\ contents

Get QuickTime 4.0 -- Your browser is extremely likely to be set up to play MIDI files already. If it is not, you will need a MIDI plug-in for your browser. For Windows and Mac, we recommend Apple's QuickTime 4.0. The plug-in is free and installs automatically. It is available from the Apple website at - **www.apple.com**.

so far in 2001

Phat Tonez (formerly My Nokia) was established in July 1999. It was the first web site in the world to send ring tones over the air to mobile phones and now is the most popular ring tone site in the world. It is licensed by the MCPS to sell copyright protected musical works as ring tones world-wide. Phat Tonez is a member of Shopsafe, the Which? Webtraders Association, and a Gold-certified Bizrate merchant. This site is rated with the ICRA to prevent unauthorised viewing by children because we do not condone the use of mobile phones by persons under the age of 16.

Company Information

We believe it is of utmost importance when you are dealing with a company on the Internet that you know as much about them as possible, which is why we have set up this section of the site. Whether you are visiting this site with view to ordering ring tones, or if you are visiting in a professional capacity in order to make a business proposition to us - we hope you find this information both informative and entertaining.

Where do you want me to start?

- Company History
  How our founder, James Winsoar, first thought of the idea of sending musical ring tones to peoples phones and how the company has grown since.
- Contact information
  We always love to hear from visitors to our web site. If you have any comments, questions or even complaints (we don't get many!) then let us know. Our call handling staff are happy to talk about anything, but our real speciality is Nokia ring tones and operator logos!
- Services to businesses and web site owners
  Do you want to set up your own ring tone service? Do you want to set up a text message (SMS) gateway? We have the value of experience and the infrastructure to assist you. Find out why when it comes to ring tones, we are number one in the world!
- **James Winsoar - coming soon**
  Learn more about the genius behind Phat Tonez and read about his tips to other budding entrepreneurs.
- **Credentials - coming soon**
  Find out about the various credentials we have, and discover why that when it comes to ring tones - you should choose no other!
- **Our competitors - coming soon**
  Everyone knows that Phat Tonez was the first ring tone web site in the world, but some of the more nefarious copycat sites that have been set up would like to tell you different! Read all about it and make up your own mind!

About us

Press

Call us on +44 870 458 1122

Is your phone compatible?
If you have a compatible Nokia mobile phone, you can customise it with cool musical ring tones, operator logos, and group graphics that appear when certain people call you. We have loads to choose from, including all the latest pop, rap, dance, and R&B hits.

We strongly advise that you check the list below. If your phone isn't listed here, please give us a call before ordering to check your phone will work. Ring us on 0870 458 1122 from within the UK (calls charged at standard national rate) or +44 870 458 1122 from abroad.

Nokia 3110, 8110, and 9000
These phones are very old models and are not supported.

Nokia 3210, and 6090
You may have one ring tone and one operator logo.

Nokia 3310
As many as seven ring tones, and one operator logo.

Nokia 402, 5110, 5130, and 5146
You can get only an operator logo. No ring tones. This is quite an old model of phone so perhaps its time for you to upgrade.

Nokia 6110, 6150, 8810, and 8850
This phone can receive one ring tone, one operator logo and up to five group graphics which appear when certain callers ring the phone.

Nokia 6210, 6250, 7110, and 8210
This handset receives up to five ring tones (check the manual for your phone), one operator logo, and five caller group graphics, so its quite feature packed!

Nokia 8110i
Not to be confused with the standard 8110, this phone can only receive one ring tone.

Nokia 9000i
Not to be confused with the 9000, this can receive many ring tones - limited only by its memory capacity.

Nokia 9110
Unlimited ring tones and one operator logo.

E&OE.

Our service works in these countries:

United Kingdom
BT Cellnet, One2One, Orange, Vodafone.
Virgin Mobile customers should select One2One.
Value Telecom customers should select BT Cellnet.

United States
Ariel.

Other countries
We can send ring tones to any mobile phone network that has a roaming agreement with BT Cellnet, provided your phone can receive 8 bit text messages and is compatible. See our compatibility chart for further details.

Instructions
Its really easy to get a ring tone or graphic onto your mobile phone, here's how:
Logos
We will send a special message to your phone, and your phone will tell you "Operator logo received". Press the menu button to see the Options, then scroll down using the arrow key until it says Save, when you select this option the logo will appear on your phone!
Phone with standard BT Cellnet operator logo graphic
Phone beeps and tells you that an operator logo has been received
Scroll down the list of options until it says Save
Your new operator logo will now appear on the screen of your phone!
Ring Tones
Ring tones are very similar. We will send a special message to your phone, and your phone will tell you "Ringing tone received". Press the menu key to go into the Options, and scroll down to Save. The ring tone will then be available in the list of ring tones on your phone, see your instruction manual to assign different ring tones to callers.
Your phone will beep and tell you that you have received a new
Scroll down the list of options to Save. Your ring tone will now be

UP.Link Gateway

UP.Link Gateway connects HDML-enabled devices on wireless networks to applications and content hosted by Web servers on the Internet (or private intranet IP networks). UP.Link Gateway provides protocol translation, ensuring that the same Handheld Device Markup Language (HDML) applications work on all networks supported by Handheld Device Transport Protocol (HDTP) and on all devices running UP.Browser. It provides real-time data compression for optimum performance. Finally, it provides gateway operators (usually wireless data/voice service providers, or carriers) with complete subscriber provisioning and system/network management functions, on a robust and scalable software platform that runs on industry standard hardware.

UP.Link Gateway provides the following features and benefits:

Alerts

HDML applications deployed on UP.Link Gateways can alert users when their attention is required by activating a beep tone, light, or vibration signal on the handset. UP.Link Gateway provides the required store-and-forward notification service to ensure delivery, as well as provides Alert status to the carrier and the information service provider.

Application Hosting

Carriers can host applications, such as UP.Mail, that increase the value in their network. These applications are integrated with the UP.Link Gateway, enabling one-step provisioning.

Compression

Responses from Web servers contain information in HDML format and are delivered to UP.Link Gateways over HTTP or HTTPS. UP.Link Gateways automatically compress HDML and forward responses, over HDTP, to wireless handheld devices running UP.Browser.

Easy Administration and Registration

The UP.Link Gateway is easy to administer and provides for the logging of all transactions. The gateway maintains a registration database of all devices, subscribers and services, enabling the gateway adminstrator to control which users have access to specific services. A powerful relational database stores all configuration, registration and logging information, ensuring flexibility, performance, scalability, and high accessibility to information.

Fax Gateway

HDML applications provide users with the ability to fax information that cannot easily be displayed on the device, such as maps, work orders and stock charts. UP.Link Gateway provides a standard connection for these services to an Internet fax service provider. Users can send information to any fax machine for printing, on demand.

Reliability and Performance

UP.Link Gateways are optimized to handle excessive traffic volume and provide the

Verizon Wireless
Exhibit 1019-0086

reliability required for large scale wireless data networks and very large subscriber bases. Resiliency and scalability is designed into every component. Sessions, connections and processes are monitored and restarted on-the-fly in response to failures inherent to the operation of wireless networks, commodity hardware and the Internet.

Security

UP.Link Gateways provide for high levels of end-to-end security. HDTP encrypts all data on the wireless network and authenticates users and Web servers. UP.Link Gateways conduct secure communications with Web servers using industry standard HTTPS and SSL protocols. Carriers have complete control over the security process, determining which certificate authorities to trust and blocking antagonistic information sites or users.

Wireless Network / Internet Connection

UP.Link Gateways use HDTP to connect mobile devices running UP.Browser to the carriers' wireless networks. The gateway automatically converts HDTP requests from mobile devices to standard HTTP and HTTPS requests that Web servers can receive. HDTP works on top of SMS, circuit- and packet-switched data transports on CDPD/AMPS, CDMA, GSM, PCS and TDMA network systems.

Rekisteröityminen

Näillä sivuilla voit selailla tiettyihin Nokian GSM-puhelimiin tehtyjä soittoääniä tai tehdä itse ihan oman soittoäänesi.

Palvelu on uudistunut! Uudella JukeBoksilla voit julkaista mitä tahansa sävelmiä, myös tekijänoikeuslailla suojattuja sävellyksiä. Aiemmin jo julkaistut biisit on siirretty takaisin biisipankkiin, josta voit julkaista ne uudelleen. Palvelun hinta on muuttunut. Yhden soittoäänen hakeminen numerosta **1559** maksaa aina **2,75 mk.**

JukeBoksin TOPTEN myös AskIT-palvelusta

Voit hakea JukeBoksin TOPTEN-listan lähettämällä tekstiviestissä hakusanan **biisit** AskIT-palvelunumeroon 1515.

Lisätietoa AskIT-palvelun sivuilta.

Mitä tarvitsen?

Tarvitset GSM-puhelimen johon voi ladata soittoääniä eli biisejä ja **Radiolinjan liittymän**.Yhden soittoäänen hakeminen numerosta **1559** maksaa aina **2,75 mk.** Tuetut GSM-puhelimet ovat Nokia 6110, 6150, 8810 (myös 8110i ja 9000i soittavat lähes kaikki äänet oikein).
Puhelimessa voi olla kerrallaan vain yksi biisi. Kun lataat JukeBoksista uuden, edellinen biisi poistuu puhelimestasi.

Huom! Mm. Nokian 5110, 3110, 2110 ja 1610 -puhelimissa ei ole mahdollisuutta siirtää tai soittaa omaa soittoääntä, koska puhelimien valmistaja ei ole varustanut näitä puhelimia tarvittavilla ominaisuuksilla. Tästä syystä JukeBoksilla tehdyt soittoäänet **eivät toimi** edellä mainituissa puhelimissa. Lisätietoa GSM-puhelimista ja niiden ominaisuuksista saat matkapuhelinkauppiaaltasi.

Lisätietoa JukeBoksi-palvelusta löydät erilliseltä ohjesivulta.

Listoja, listoja, listoja...

Tsekkaa Suomen kuumimmat soittoäänet TOPTEN-listalta tai siirry selailemaan muita soittoäänilistoja:

- Tuoreimmat biisit
- Biisien nimilista
- Esittäjälista
- Soittoäänityyppilista

Haluatko puhelimeesi ikioman biisin?

Oman soittoäänen teko tapahtuu Harmooni-ohjelmalla, joka toimii parhaiten Internet Explorer 4.0.1 tai Netscape 4.0.5 selaimilla. Muiden selainten käyttäminen saattaa jumiuttaa koneesi! Selaimessasi pitää olla Java-toiminnot päälle kytkettyinä.

https://web.archive.org/web/19990125090438/http:/jukeboksi.radiolinja.fi/

Verizon Wireless
Exhibit 1019-0089

Mikäli et ole aiemmin tehnyt soittoääniä Sinun tarvitsee rekisteröityä ensin JukeBoksin harmonistiksi. Rekisteröityminen tapahtuu rekisteröitymissivulla.

Vanhat harmonistit voivat siirtyä suoraan omaan biisipankkiinsa.

Voit myös vain testata Harmoonia. You can also just test the Harmooni program.

JukeBoksi-palvelun on Radiolinjalle ideoinut ja toteuttanut Yomi Media Oy.

JOTTA SUOMALAISET VOISIVAT PUHUA ENEMMÄN.

21.	Believe	Antiloop	Dance	CAFFGW
22.	Ritari Ässä	Keijo Vuorela	Melodia - pitkä	PEVAMZ
23.	Star Wars	Star warsin höperö k	Hengellinen	QJHNOE
24.	Night Rider TV-sarja	?	Melodia - pitkä	JSNFMK
25.	Axel F	Harold Faltermeyer	Pop	ZOSGOR
26.	Maamme-laulu	Suomen maa	Kansanlaulu	YKIZMM
27.	Viimeinen	Nylon Beat	Disco	YLYZXV
28.	Sweet home Alabama	Lynyrd skynyrd	Rock	CNGLNH
29.	My favourite game	Cardigans	Rock	UKPOSZ
30.	yesterday	The Beatles	Iskelmä	RNWQUU

Näin siirrät biisin omaan GSM-puhelimeesi:
1. Kuuntele biisi klikkaamalla biisin nimeä.
2. Lähetä valitsemasi biisin tunnus (esim. YSKLQW) tekstiviestissä numeroon 1559.
3. Odota noin minuutti niin puhelimesi näytölle tulee teksti "Soittoääni vastaanotettu".
4. Soita biisi ja talleta tai poista se. Lisätietoja löydät puhelimesi käyttöohjeesta.

Huom! Voit hakea biisin ainoastaan puhelimeen, jossa on Radiolinjan liittymä.

Ohjeita JukeBoksin

Radiolinjan JukeBoksi tarjoaa mahdollisuuden tehdä, kuunnella ja ladata GSM-puhelimeen omia ja muiden tekemiä sekä myös tekijänoikeuslailla suojattuja soittoääniä, jotka on tuotettu JukeBoksin musisointiohjelmalla eli Harmoonilla. Tutustu siis ohjeisiin, jotta saisit oman biisisi soimaan puhelimessasi. Tekijänoikeuslaista saat lisää tietoa Teostosta.

Muista kuitenkin aina tahdikkuus ja kohteliaisuus! Kytke puhelimesi äänettömäksi aina silloin kun sen soiminen häiritsee tai loukkaa muita ihmisiä.

Radiolinjan JukeBoksi-palvelun ohjeet jakautuvat kahteen osaan:

- Soittoäänien eli biisien lataaminen puhelimeen
- Uuden soittoäänen tekeminen

Soittoäänien eli biisien lataaminen puhelimeen

Soittoäänien lataamiseen tarvitset **Radiolinjan** GSM-liittymällä varustetun Nokian GSM-puhelimen mallia 6110, 6150 tai 8810. Vanhemmissa malleissa 8110i ja 9000i saattavat jotkut sävelet soida väärin.
Puhelimessa voi olla kerrallaan vain yksi biisi - kun lataat JukeBoksista uuden, edellinen biisi poistuu puhelimestasi.

Huom! Mm. Nokian 5110, 3110, 2110 ja 1610 -puhelimissa ei ole mahdollisuutta siirtää tai soittaa omaa soittoääntä, koska puhelimien valmistaja ei ole varustanut näitä puhelimia tarvittavilla ominaisuuksilla. Tästä syystä JukeBoksilla tehdyt soittoäänet **eivät toimi** edellä mainituissa puhelimissa.

Lisätietoa eri kännyköistä saat kännykkäkauppiaaltasi. Radiolinjan liittymän saat lähimmältä Radiolinjan edustajalta.

Haluttu soittoääni eli "biisi" haetaan puhelimeen lähettämällä soittoäänen tunnus (esimerkiksi GHJSDF) tekstiviestinä palvelunumeroon **1559**. Erillistä suuntanumeroa ei tarvita, ei edes ulkomailla. Tarkista palvelun hinta palvelun etusivulta.

Huom! Älä lähetä vahingossa biisin nimeä vaan aina biisin 6 kirjaimen tunnus.

Noin minuutin kuluttua tekstiviestin lähettämisestä puhelimeesi tulee ilmoitus saapuneesta uudesta soittoäänestä, jonka voit kuunnella, tallentaa tai poistaa. Lue tarkemmat ohjeet GSM-puhelimesi käyttöoppaasta.

https://web.archive.org/web/19990219145135/http://jukeboksi.radiolinja.fi/ohje.html

Verizon Wireless
Exhibit 1019-0095

1. Julkaistujen biisien selaaminen
Julkaistuja soittoääniä voit selata biisin nimen, säveltäjän tai tyylin mukaan. TOPTEN-sivulta löydät aina tämän hetken suosituimmat biisit: sinne listataan kymmenen eniten ladattua soittoääntä viimeisen viikon ajalta. Listat ja jopa TOPTEN päivittyvät jatkuvasti reaaliajassa.

Klikkaamalla listalta kappaleen nimeä avautuvat biisin tiedot omaan ikkunaan ja soittoääni lähtee soimaan, mikäli tietokoneeseesi on kytketty kaiuttimet. Näin voit esikuunnella soittoäänen ennen sen lataamista puhelimeesi.

Huom! Biisien esikuuntelu toimii parhaiten Internet Explorer 4.0.1 tai Netscape 4.0.5 selaimilla sekä näitä uudemmilla selainversioilla. Muut selaimet saattavat mennä jumiin.

2. Julkaistun biisin lataaminen puhelimeen
Haluamasi biisin löydettyäsi lähetät vain soittoäänen tiedoissa olevan tunnuksen esimerkiksi SGHTVY tekstiviestinä numeroon 1559 . Hetken kuluttua saat vastauksen ja voit kuunnella ja tallentaa uuden soittoäänen. Ohjeet soittoäänien tallentamiseen löydät GSM-puhelimesi käyttöohjeista.

3. Julkaisemattoman biisin testaaminen puhelimella
Omia julkaisemattomia biisiä voit hakea puhelimeesi samalla tavalla: lähetät vain biisipankissasi olevan biisin tunnuksen tekstiviestinä numeroon 1559. Jos et ole vielä julkaissut biisiäsi, niin se näkyy vain Sinulle. Vasta julkaisun jälkeen biisin nimi ja tunnus ovat kaikkien palvelun käyttäjien nähtävillä. Myös tämä biisin hakeminen maksaa saman verran kuin listoilla olevien biisien hakeminen.

Uuden soittoäänen tekeminen

Soittoäänien tekemisessä on kolme vaihetta. Jotta voisit tuottaa oman biisin, sinun on ensin rekisteröidyttävä palvelun käyttäjäksi eli harmonistiksi. Rekisteröidyttyäsi siirryt musisointiohjelman eli Harmoonin ääreen. Talletettuasi uuden biisin voit halutessasi julkaista sen, jolloin uusi soittoääni on kaikkein ladattavana.

Huom! Harmooni toimii parhaiten Internet Explorer 4.0.1 tai Netscape 4.0.5 selaimilla sekä näitä uudemmilla selainversioilla. Muut selaimet saattavat mennä jumiin.

Huom! Lisäksi selaimessasi pitää olla cookie-tuki päälle kytkettynä.

1. Rekisteröityminen harmonistiksi
Rekisteröitymisessä valitset itsellesi harmonistitunnuksen ja salasanan, joilla pääset henkilökohtaiseen biisipankkiisi ja Harmooniin. Lisäksi Sinun tulee keksiä itsellesi taiteilijanimi, jota käytetään julkisilla listoilla.

Rekisteröitymisen jälkeen siirryt biisipankkiisi. Seuraavalle kerralla pääset tunnuksellasi suoraan tekemään biisejä. Täytä rekisteröitymiskaavakkeen jokainen kohta huolellisesti. Voit muuttaa tietojasi myöhemmin biisipankista.

2. Biisipankki

Verizon Wireless
Exhibit 1019-0096

Biisipankissa näet kaikki tallettamasi ei-julkaistut biisit. Pääset editoimaan biisiä klikkaamalla sen nimeä. Julkaistuja soittoääniеä et pääse enää editoimaan vaan ne poistuvat biisipankistasi julkaisun jälkeen. Voit poistaa biisin myös ilman julkaisua klikkaamalla Poista-napista.

Uutta biisiä pääset säveltämään napista Tee uusi biisi. Säveltäminen tapahtuu Harmoonilla.

3. Harmoonin toiminta
Harmoonissa on nuottiviivasto, jolle sävelmäsi rakentuu. Viivastolla on pystyviivoilla erotettuna parhaillaan muokattava nuotti. Nuottiviivastolla liikutaan nuolinäppäimillä tai hiirellä. Yleensäkin Harmoonia voi käyttää sekä näppäimistöltä, että hiirellä. **Nuotteja ja taukoja voi olla yhteensä enintään 64 kappaletta yhdessä biisissä.**

Voit soittaa biisisi painamalla play-nappia. Soitto loppuu painamalla stop-nappia. Talleta-nappi tallentaa biisin ja tyhjennä-nappi tyhjentää koko nuottiviivaston.

Pääset muokkaamaan biisiäsi painamalla edit-nappia tai välilyöntiä. Nuotin voit syöttää joko näppäimistöltä tai klikkaamalla hiirellä ruudulla olevan nuottikoskettimiston koskettimia. Koskettimisto toimii myös näppäimistöltä (Z,X,C,... ja Q,W,E,..). Voit poistaa nuotin DEL- tai Backspace-näppäimellä ja lisätä INS-näppäimellä.

Voit muuttaa nuotin pituutta painamalla nuotin tyyppi -nappia hiirellä (myös O ja P-näppäimet toimivat). Samasta napista löydät myös tauot. Tempo-näytöstä näet tämän hetkisen biisin nopeuden. Tempoa ja nuotin tyyppiä muutat nopeasti painamalla hiiren napista ja liikuttamalla samalla hiirtä.

Mikäli haluat perua viimeisen toimintosi, paina undo-nappia.

HUOM! Muista, että soittotilan ja muokkaustilan vaihtaminen tapahtuu välilyöntiä tai editoi-nappia painamalla.

Lopuksi talleta biisisi talleta-napista tai poistu Harmoonista sivun alalaidan linkistä. Voit myös tehdä välitallennuksia. Tallennettaessa sinulta kysytään biisin nimi ja tyylilaji.

4. Biisin julkaiseminen
Kun julkaiset soittoäänesi, kaikille palvelun käyttäjille tulee mahdollisuus hakea se omalle matkapuhelimelleen etkä pääse enää editoimaan sitä. Voit julkaista ainoastaan tallentamasi soittoäänet. Biisipankki-sivulla näkyvässä biisilistassasi on kunkin biisin kohdalla painike Julkaise, jota klikkaamalla pääset julkaisemaan soittoäänesi.

Jos julkaiset soittoäänen, sinun katsotaan hyväksyneen seuraavat julkaisuehdot:

- Soittoäänen voi kuka tahansa noutaa matkaviestimelleen ilman soittoäänen ohjelmoijan lupaa tai tälle maksettavaa korvausta
- Vastaat itse julkaisemastasi soittoäänestä
- **Radiolinjalla on oikeus poistaa julkaistu soittoääni, jos näitä ehtoja rikotaan**
- Radiolinja ei vastaa soittoäänen julkaisun tai niiden palvelusta poistamisen aiheuttamista vahingoista

Verizon Wireless
Exhibit 1019-0097

Julkaistessasi tunnetun tekijänoikeuslailla suojatun sävellyksen, sinun on täytettävä sävellykseen liittyvät tiedot. Tekijänoikeuslailla suojatun sävellyksen julkaisussa pakollisia tietoja ovat sävellyksen nimi, säveltäjä ja tunnettu esittäjä. Tekijänoikeuslaista saat lisää tietoa Teostosta.

Julkaistessasi soittoäänen voit valita haluatko osan harmonistitiedoistasi näkyviin tai vain pelkän taiteilijanimesi. Radiolinja ei vastaa harmonistitietojen oikeellisuudesta ja voi poistaa harmonistitunnuksesi ilman eri lupaa.

5. Julkaistun biisin poisto

Näet kaikki julkaisemasi biisit listassa biisipankki-sivun lopussa. Voit halutessasi poistaa julkaistun biisin. Tämän jälkeen biisi häviää lopullisesti koko JukeBoksista ja sen kaikilta listoilta, eikä sitä voi saada takaisin biisipankkiin tai ladata enää puhelimeen.

Huom! Julkaistua biisiä ei voi hakea takaisin biisipankkiin muokkausta varten. Julkaistun biisin voi ainoastaan poistaa kokonaan.

JOTTA SUOMALAISET VOISIVAT PUHUA ENEMMÄN.

Verizon Wireless Launching New High-Speed 3G Wireless Network In Syracuse, New York Area

Express NetworkSM to Provide High-Speed Wireless Data Access
in Upstate New York and Nationwide

June 28, 2002

John O'Malley

Like 0 Tweet 0 Share 0 Share 0

SYRACUSE, NY — Starting Tuesday, July 2, Verizon Wireless customers in the Syracuse, Utica, Watertown, Ithaca, Auburn, Canton and Potsdam areas will be able to reap the rewards of a significantly faster, more robust wireless experience with the company's commercial launch of its 1XRTT network. ***Express Network*** - the first deployment of 3G technology by a wireless company in Central New York - will enhance all levels of wireless communications - from a simple voice call, to full Internet browsing, and email. This high-speed network also supports enterprise applications, giving companies with mobile employees tools for increased productivity and efficiency.

This latest ***Express Network*** extension completes Verizon Wireless' 3G network expansion across Upstate New York (the network launched in Buffalo, Rochester and the rest of Western New York in March, and in the Capital District and Eastern New York in April) and allows more Americans across the country to access the most expansive high-speed wireless data network available.

The ***Express Network*** is Verizon Wireless' 1XRTT data network, capable of data transmission speeds up to 144 kilobits per second (kbps). The ***Express Network*** will give users full Internet access, intranet access and traditional email functionality via a laptop and select PDAs at unprecedented speeds for wireless access. Business customers and individual consumers using ***Express Network*** can expect high-speed wireless data and robust Internet access at average speeds between 40 and 60 kbps, with bursts up to 144 kbps - similar to or better than speeds users experience when dialing in from their home PC.

"Verizon Wireless jump-started the wireless data services marketplace by building the country's first and only national high-speed wireless data network and is now reinforcing that network with an aggressive expansion plan," said John Palmer, president of Verizon Wireless' Upstate New York Region. "As the industry leader in the high-speed wireless data market, this market addition broadens our commanding lead and forms an even deeper 3G national network."

Pricing Plans

Verizon Wireless
Exhibit 1019-0100

Verizon Wireless recently announced a flat-rate pricing plan for data-hungry customers. For $99.99 per month with some restrictions, subscribers can download unlimited data on the ***Express Network***. Customers can also sign up for time-based usage plans, which begin at $35 monthly access for 150 minutes of connection and may be used for either voice or data calls, and $55 and $75 monthly access plans include 400 and 600 minutes respectively. Verizon Wireless offers enterprise customers pricing based on megabyte usage with rate plans starting at $35 monthly access for 10 MB, $55 monthly access for 20 MB, and $75 monthly access for 40 MB of data sent and received on the ***Express Network***.

Equipment Choices

Verizon Wireless offers five equipment options to ***Express Network***customers. The Verizon Wireless 2235 handset from Kyocera, the VX1 by LG and the 9155-GPX from Audiovox, are each compact wireless phone options with varied pricing and features. These wireless phones function as a modem when used with a laptop and a compatible Mobile Office connectivity kit, sold separately, to access the Express Network. The Thera is the newest Windows Powered Pocket PC that enables consumers to use the same device to make voice calls, access the ***Express Network*** or Mobile Web. Thera, by Audiovox, is also a dual-band wireless phone and a powerful mobile computing device that can access data on several platforms. For customers who value the form factor of a PC card, the AirCard 555 from Sierra Wireless can be used with laptops and select PDAs.

Express NetworkService Area

The Verizon Wireless Express Network - the only national high-speed wireless Internet access service - is available to customers in the following areas:

- The Eastern seaboard, including other major Northeast regions: Norfolk, VA to Washington, DC, Baltimore, Philadelphia and Pittsburgh, New York, including Albany, Buffalo and Rochester, through to Boston in Portland, Maine; and Burlington, Waterbury and Montpelier in Vermont
- Midwest: Chicago, Illinois and Gary, Indiana, St. Louis; several locations throughout Ohio including: Columbus, Akron, Toledo and Cleveland; in the greater Kansas City area, including Overland Park, Topeka and St. Joseph, Missouri, and in Wichita; major markets in and around Detroit, Michigan including Lansing and Ann Arbor and Milwaukee's metro area
- Major Texas markets: Dallas, Fort Worth, Houston, Austin, San Antonio, Corpus Christi, McAllen and Brownsville
- The east and west coasts of Florida: Miami, Ft. Lauderdale, Boca Raton, West Palm Beach, Lakeland, Tampa/St. Petersburg, Key West and the greater Orlando area
- West: in the technology-savvy Silicon Valley and San Francisco Bay Area of Northern California; Salt Lake City, Utah; in Portland, Oregon; throughout all of Southern California, including the cities of Los Angeles, San Bernardino, San Diego and Palm Springs.

About Verizon Wireless

Verizon Wireless is the nation's leading provider of wireless communications. The company has the largest nationwide wireless voice and data network and 30 million customers. Headquartered in Bedminster, NJ, Verizon Wireless is a joint venture of Verizon Communications (NYSE:VZ) and Vodafone (NYSE and LSE: VOD). Nokia 6150

Announced in **August 1998**

Like 8 Tweet 0 Pin it Share

Size

- Weight: 141 g (slim battery)
- Dimensions: 129 x 47 x 28 mm, 130 cc

Display

- Illuminated dot-matrix display
- Up to 5 lines for text, numbers, and graphics
- Dynamic display for large/small font
- Permanent signal and battery status indicators
- Last digit and full display clear
- Full-screen cursor editor

Keypad

https://web.archive.org/web/20131213093546/http://nokiamuseum.info/nokia-6150/

Verizon Wireless
Exhibit 1019-0105

- One-touch voice mail button
- International access button (+)
- Keyguard
- Illumination

Call Management

- Various speed-dialing methods
- Call repeat
- Any key answering
- Conference calling (1 + 5 persons)
- Call waiting/call hold
- Call transfer
- Call/fax divert; separate for fax and voice
- Display number or name of incoming caller
- Disable/enable display of number or name in connected calls
- Call grouping features
- Advanced tone dialing (DTMF) features
- Automatic and manual network selection
- Welcome message
- Alternate speech and data or fax

Memory Functions

- 150 names and numbers in phone, up to 255 in SIM card
- 10 last calls dialed/received/missed with time stamp
- Page function: Names, numbers or both shown when scrolling memory
- Phonebook fetch service for SMS and calendar
- Phonebook listing for name, name and number, or for name in big font

Short Message Service

- Send and receive SMS messages up to 160 characters long
- SMS class 0, 1, 2, 3 type messages supported
- Return call type message: Easy to call number in message
- Sent message delivery report
- Easy access to smart messaging services with downloadable menus

Security and Cost Control

- Emergency calls 112 (number operates in specific countries only) without SIM-card and with key locked phone
- Programmable security level and code
- Various call barring possibilities
- Advice of charge
- Setting of cost limit to outgoing calls (also incoming calls if costs are invoiced)
- Last and cumulative call duration and charge
- Fixed dialing: Calls to predefined numbers or prefixes
- Closed user group

Optional Controls

- 31 languages in factory preset language groups

Verizon Wireless
Exhibit 1019-0106

- Automatic menu language selection if supported by SIM
- 35 selectable ringing tones, SMS alert tones
- Selectable ringing volume, including silent alert with flashing lights
- Adjustable profiles for different usage situations with call grouping and caller group identification

GSM Data Transmission

- 9600 bps, up to 34,400 bps if compressed
- Send and receive faxes, email, and files
- Data transmission with automatic error correction
- Mobile terminated unstructured supplementary services data
- Built-in infrared link (to compatible PC, printer, another Nokia 6100-series phone)

Calendar Function

- Writing and viewing notes, reminders, meetings, birthdays, and calls

Dual Band Operation

- EGSM 900, GSM 1800, and GSM 900/1800 dual-band networks; automatic switching between bands

Power Management

Battery	Talk time	Standby time	Charging times
Ultra Slim Battery BPS-1 600 mAh,Li-Polymer	1h 40min – 3h	30 – 170h	Standard: 2h 30min Fast: 1h 25min
Slim Battery BLS-2N 900 mAh Li-Ion	3h 30min - 5h 20min	60 – 290h	Standard: 4h 30min Fast: 2h 15min
Standard Battery BMS-2S 900 mAh NiMH	2h 30min - 4h 30min	50 – 250h	Standard: 4h 30min Fast: 1h 30min

ize

- Weight: 141 g (slim battery)
- Dimensions: 129 x 47 x 28 mm, 130 cc

Display

- Illuminated dot-matrix display
- Up to 5 lines for text, numbers, and graphics
- Dynamic display for large/small font
- Permanent signal and battery status indicators
- Last digit and full display clear
- Full-screen cursor editor

Keypad

FusionOne Joins WAP Forum - Demonstrates Support at PCS '99

New Service Showcases the Ability to Access Personal Information from any WAP Device

New Orleans, LA - September 21, 1999 - FusionOne, a pioneer in the development of next-generation Internet sync technology, today reinforced its commitment to wireless connectivity by joining the WAP Forum, the industry association behind the de-facto world standard for wireless information and telephony services. As a member of the Forum, FusionOne will enable users to access all of their personal digital information from any WAP-enabled device. FusionOne will be showcasing its WAP (Wireless Application Protocol) support in the Nokia booth (#4644) at PCS '99 in New Orleans taking place this week.

At PCS, FusionOne will demonstrate its WAP support on the Nokia 7190 mobile phone. Through the Nokia WAP browser, users will be able to view and access all of their personal digital information - contacts, calendar appointments, even files - synced to FusionOne's personal information portal, eDock.com. Not only is the information viewable, it is also manageable. Users can instantly transfer names and numbers from eDock directly into the WAP phone for instant dialing access, as well as remotely specify files to be automatically and instantly faxed or emailed from their PC - all through the power of FusionOne's Internet Sync and WAP.

FusionOne Demonstrates WAP Support at PCS '99

"FusionOne's Internet Sync is paving the way for advanced mobile information access by enabling users to enter information just once in any device with confidence that it will automatically be updated in all their other devices, including mobile phones," said Rick Onyon, president and CEO of FusionOne. "By extending our service to WAP-enabled devices, we further underscore our commitment to connecting people with their information - anytime, anywhere."

FusionOne's WAP functionality will be available with the release of the FusionOne free Internet Sync service in Q4 of this year. This new service, initially developed specifically for Nokia in partnership with the company, will support all WAP-enabled devices.

About Internet Sync¡ FusionOne's Internet Sync is a simple and seamless way for users to keep their personal digital content up-to-date and "in sync" across their computing and communications devices. Leveraging its unique transaction-based model and the power of the Internet, FusionOne synchronizes and distributes information easily and efficiently, without the need for any contact between devices. With FusionOne, users update files and contacts on their office PC with assurance that their information will automatically be updated in their cell phone, home PC and Palm Pilot. Additionally, files stored on the office computer are easily accessed from any Web-enabled device, regardless of platform and operating system.

Vibrating to the Beat of Your Ringtone

In the world of ever changing rings, someone has coined a new idea. Why not set your vibration to the beat of your favorite song? Of course!

SK Telecom is launching vibration ring-tones, applying Immersion's vibration technology, so that users can feel the beat of the ringtones, announced the mobile operator on Monday. Telecoms Korea reports.

"The first handset supporting SKT's new service is SCH-B450 of Samsung Electronics.
Users will be able to control the intensity and the pattern of vibration as well as set the type of vibration according to the caller."

I like it.
Cheers,
Taylor
